

CAFE RETAIL FITOUT

BILL OF QUANTITIES TEMPLATE

For a 2,000 sqft cafe. Real itemised cost data from Design Pulley (Akash), an interior design and build studio run by IIM Ahmedabad graduates. www.designpulley.com. May 2026.

This is not a generic industry estimate. The detailed cost-per-sqft breakup below was shared directly by Akash at Design Pulley, based on real fitout projects they have executed. Use this to sanity check any quote you receive before signing a fitout contract.

Real Reference Points -- With Context

Reference	Rate / Sqft	Context
AB Coffee	Rs 1,500-2,000	Standardised layout, office tech park locations. Lower cost due to repeatable design and simpler site conditions.
Boojee Cafe	Rs 3,000 (estimate)	Upper-functional / design-led independent cafe. This is an estimate, not an audited actual -- treat as indicative, not exact.
Full Premium Range (Akash, Design Pulley)	Rs 3,000-4,500	Detailed itemised breakup below. This is the most granular and current data point in this template.

Important: Boojee Cafe at Rs 3,000/sqft is positioned at the UPPER END of the functional-to-mid tier, not as a "mid-range" benchmark. The detailed premium breakup from Akash (Rs 3,000-4,500/sqft) is a separate, more design-intensive tier above this.

Detailed Cost-Per-Sqft Breakup (Premium Tier)

Source: Akash, Design Pulley -- itemised data shared directly. Total range: Rs 3,000-4,500/sqft.

Line Item	Rs / Sqft	On 2,000 sqft	Notes
Finishing works (partition, paint, tiling, ceiling, glass)	900-1,300	Rs 18-26L	Largest single line item
Movable furniture (chairs, tables, counter top, sofa)	700-1,000	Rs 14-20L	Second largest. Do not under-budget here.
Facade, ACP, signage	250-400	Rs 5-8L	Can vary significantly by spec
HVAC	350-450	Rs 7-9L	
Electrical -- internal wiring, DB, switchboard	200-250	Rs 4-5L	
CCTV, fire, PA (excl. sprinkler)	200-300	Rs 4-6L	
Lightbox -- display, graphics, vinyl, props	100-250	Rs 2-5L	Visual storytelling elements
Electrical -- all types of lights	100-200	Rs 2-4L	
Civil works (cleaning, brickwork, debris removal, demolition, PCC, RCC)	100-300	Rs 2-6L	Wide range -- site-dependent
Miscellaneous	100-200	Rs 2-4L	
TOTAL	3,000-4,500	Rs 60-90L	Sum of line items above

Finishing works and movable furniture together account for roughly 55 to 60% of the total budget in this premium tier. These are also the two line items that most directly affect what a guest sees and feels. Civil works has the widest range (Rs 100-300/sqft) because it depends entirely on the existing condition of the site -- a bare shell costs far less to prep than a space requiring demolition of prior fitouts.

How to Use This Template

- Scale by area. For a space other than 2,000 sqft, multiply each per-sqft rate by your actual area to get item-wise and total budgets.
- Compare any quote against this breakup. If finishing works or furniture is priced far outside Rs 900-1,300 and Rs 700-1,000 per sqft respectively, ask why before signing.
- Site condition drives civil works cost more than design choices do. Get a site inspection before accepting any fixed quote on this line item.
- Always add a 10-15% contingency on top of any quoted total. Site conditions, structural surprises, and design changes during execution are the norm, not the exception.
